**DETAILED ACTION**

1. Applicant's amendment and accompanying remarks filed August 16, 2007 are acknowledged.
2. Examiner acknowledges cancelled claims 1-12.
3. Examiner acknowledges newly added claims 13-18.
4. The rejection of claims 1, 5 and 7 under 35 U.S.C. 102(e) as being anticipated by Ueda et al., U.S. Patent Number 6,916,552.

***Claim Rejections - 35 USC § 102***

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

6. Claims 13 and 16 are rejected under 35 U.S.C. 102(e) as being anticipated by Tokito et al., U.S. Patent Number 6,416,887.

Tokito discloses an organic electroluminescent device comprising a pair of electrodes with a luminescent layer disposed therebetween (see abstract). Additionally, the Tokito reference discloses that the luminescent layer comprises a spiro compound with the structure

Art Unit: 1794

wherein A is a carbon atom or other atom (includes Si) (see column 3, lines 24-68). Also, Tokito

discloses in Table 1, R<sub>1</sub> to R<sub>4</sub> are . The reference reads on the instant claims when A is carbon or silicon and R<sub>1</sub> to R<sub>4</sub> are each formula VII of the present claims.

### ***Double Patenting***

7. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the “right to exclude” granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined

application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

8. Claims 13-18 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claim 18 of copending Application No. 10/525,198. Although the conflicting claims are not identical, they are not patentably distinct from each other because both applications recite an organic electroluminescence device comprising a pair of electrodes with a luminescent layer disposed therebetween. Additionally, both applications recite that the luminescent layer comprises a spiro compound with the structure

Art Unit: 1794

wherein Ar<sub>13</sub> to Ar<sub>16</sub> are each a substituted or unsubstituted aryl

group. Also, both applications recite that the luminescent layer comprises a fluorene compound with the structure

The fluorene compound of the co-pending application reads on the present claims when X<sub>1</sub>=X<sub>3</sub> is a direct bond; X<sub>2</sub> is an arylene group and m=n=0. The co-pending application does not disclose that the arylene group is fluorene and that the substituted or unsubstituted aryl group is a condensed group as in formulae III-VII of the present claims. However, arylene and aryl are generic and encompass fluorene and formula III-VII of the present claims.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

### ***Response to Arguments***

9. Applicant's arguments with respect to the present claims have been considered but are moot in view of the new ground(s) of rejection.
